JACKSON BATTISHILL: Jackson's favorite subject in school has always been mathematics. He enjoys the subject because it involves patterns and sequences to allow mankind the ability to predict and understand the world better. His father was his earliest teacher who shared information about investing and the stock market as well as economic issues with him. And now Jackson will be attending the University of Washington this fall and plans to concentrate in Economics. Jackson earned a perfect 4.0 grade point average while attending Stadium High School. He also was awarded the honor of USA Water Polo Academic All-American as a result of his dedication and work ethic to both the water sport and to his education. He's spending his personal time involved in employment opportunities as a valued member of the workforce at the Fircrest Golf Club.

ANNALISE COLEMAN: Annalise has earned an exceptional 3.9 grade point average during her four years at Stadium High School while participating in ballet, jazz and modern dance. The performing arts have always been an integral part of her life since she was a child. Dance inspired involvement in power lifting competition which led her to the decision to major in the Paramedicine Program at Central Washington University this fall. Her professional goal is to become a Firefighter. Annalise was inspired to follow this health-science direction after completing high school classes in "Anatomy and Physiology" and "Addiction in the Brain". She interviewed firefighters and was inspired by their bravery and commitment to their communities. Annalise is a favorite child caregiver as well as a Starbucks barista.
